

Viridis Laboratories
Recognized for Our Quality &
Consistent Accuracy

Protecting Customers Products:

- All analytical instrumentation is state-of-the-art and was purchased new.
- Laboratory air exchanges occur on average seven (7) times per hour, helping minimize cross contamination issues and maintaining a sterile environment.
- Samples collected from customers are stored between 50° - 60° during transport.
- Samples at lab are stored @ 55° F and 56% humidity
 - Helps preserve and maintain the existing cannabinoid and terpene profiles expected.
 - Inhibits microbial growth keeping customers' samples free from contaminants such as molds and coliforms.
- All consumables during sample collection and analysis is single-use, eliminating chances for cross-contamination.
 - Personal protection equipment (PPE)
 - Amber colored collection jars
 - Grinding media
 - Scissors and scalpels
 - Vials / Extraction tubes
 - Foreign matter and water activity analytical trays
- Laboratories are designed with separate analytical spaces and rooms to minimize the chances for cross-contamination.

About Us

We at Viridis Laboratories value cannabis growers and truly appreciate the effort it takes on their part to grow and deliver the highest quality cannabis products to the marketplace. We recognize the time, energy, and effort it takes to grow good quality cannabis and all the variables that must be accounted for to get the best possible harvest.

Due to the customer commitment to grow and produce quality cannabis products, Viridis has built two state-of-the-art laboratories to bring confidence to the testing market. The experience and know-how of the Viridis team is second to none in the industry and therefore able to provide our customers with the highest quality and most accurate testing. Partnering with Viridis improves brand recognition and maximizes consumer confidence.

Our mission is to ensure health and safety within the cannabis industry. We achieve this by assisting cannabis growers and processors move safe, healthy and quality products to the consumers. We do this by offering the highest quality and trusted testing in the industry, while also providing exceptional customer service and support.

Viridis Laboratories is proud to be:

- ISO 17025:2017 A2LA Accredited
- State of Michigan licensed to test both medical and adult-use cannabis
- Patient Focus Certified (PFC) by Americans for Safe Access
- Member of the Michigan Chamber of Commerce
- Sustaining Sponsor for the Midwestern iHemp Expo

Laboratory Services Offered

- Cannabinoid/Potency
- Foreign Matter
- Moisture Content
- Water Activity
- Microbials
- Heavy Metals
- Pesticides
- Residual Solvents
- Terpenes
- Vitamin E Acetate
- Plant Gender Screening
- Homogeneity Testing

Sample Drop-Off:

Cannabis samples not regulated under the State of Michigan's Marijuana Regulatory Agency (MRA) may be dropped-off at either of our two laboratories whose addresses are listed within this brochure. MRA licenses must call and arrange for sample collections at their respective sites. For large volume collections, please contact us in advance for a more efficient and proper collection process.

Pricing

Viridis Laboratories offers competitive and volume pricing. Please contact us for details on the back of this brochure, or visit our website at www.viridis-labs.com.

Test Results:

Test results are typically available within 3-4 business days from the time we acquire the sample(s). Certificates of Analysis (CoA's) are sent to our customers via email. Those who are regular customers can utilize our web-based portal which provides access to their testing status, results in both CoAs and Metric file formats, as well as sample images.

Customer Service:

Viridis Laboratories is respected as one of the leading cannabis testing laboratories throughout Michigan. We've earned this reputation through our consistent and accurate testing as well as our approach to customer service.

The regulatory compliance landscape can be difficult to navigate by having to deliver to the consumer contaminant-free and potency compliant cannabis products. Here at Viridis, we have the latest equipment and instrumentation to not only ensure reliable testing, but also to assist you in all your research and development needs.

Whether the concerns are heavy metals, pesticides, residual solvents or microbials, let Viridis assist you in identifying these costly issues. By partnering with us, we will ensure that your cannabis products will successfully navigate regulatory compliance and help strengthen consumer confidence.
